

RESEARCH INFORMED CONSENT FORM

STUDY TITLE: Studying the psychological mechanisms of pedagogical interactions and social cognition (IRB-FY2026-11440)

INVESTIGATOR(S): Mark Ho

INVITATION TO BE A PART OF A RESEARCH STUDY

You are invited to participate in a research study. This form has information to help you decide whether or not you wish to participate - please review it carefully. Your participation is voluntary. Please ask any questions you have about the study or about this form before deciding to participate.

PURPOSE OF THE STUDY

The purpose of this study is to understand how people make judgments and decisions about scenarios involving teaching, learning, and social reasoning.

ELIGIBILITY TO PARTICIPATE

You are eligible to participate in this study if you are 18 years of age or older, have normal vision, and are accessing this study on a desktop or laptop computer.

You should not participate if you have previously participated in a related study from this research group, or if you are unable to use a desktop or laptop computer with a keyboard and mouse.

To determine if you are eligible, we will use Prolific screening filters.

DESCRIPTION OF STUDY PROCEDURES

If you agree to participate, you will be asked to:

1. Read a set of instructions (which may include demonstrations and comprehension checks) for a judgment task involving pedagogical or social contexts.
2. Complete one or more rounds of the task, in which you make judgments about scenarios shown on screen using your keyboard or mouse. The scenarios may involve hypothetical students, learners, or other agents. Examples include problems given to students along with their work, or descriptions/depictions of someone's behavior.
3. Answer brief questions during or after the task about your experience or what you saw.
4. Complete brief questions about your background and device information.
5. Read a short debriefing page.

RISKS OR DISCOMFORTS

This study involves the following risks or discomforts: The physical risks of this study do not exceed the risks associated with normal computer use, such as playing a simple browser-based game and answering questions on a computer. Data is stored in a secure database, so there is

a small possibility of a breach in confidentiality. This risk will be minimized by deleting the data that connects your Prolific ID to your response data as soon as possible after payment is completed. Random, anonymized IDs will be generated as referents instead.

Please tell the researchers if you believe you are harmed from your participation in the study.

BENEFITS

It is hoped that this study will contribute to knowledge about how people reason about teaching, learning, and the actions of others, which may contribute to advances in cognitive science.

You are not expected to directly benefit from participation in the study.

COMPENSATION

Your compensation for this study will include base payment of [X], and the study is expected to take [X]. [You will also receive a performance-based bonus of up to \$X]. Payment will be issued through Prolific. If you decide to withdraw from the study before completion, you will receive pro-rated compensation for your time spent in the study. You may skip any optional questions and still receive full compensation.

VOLUNTARY PARTICIPATION

Participating in this study is completely voluntary. You may choose not to take part in the study or to stop participating at any time, for any reason, without penalty or negative consequences.

If you withdraw from the study early you will receive, at a minimum, pro-rated compensation for your time spent in the study at the base rate. You will not be eligible for a performance-based bonus.

We may end your participation in the study if you do not meet the eligibility requirements or if technical issues prevent you from completing the task.

If you withdraw or are withdrawn from the study early, then we will keep information about you that is already collected.

PRIVACY & DATA CONFIDENTIALITY

In this study, you may be asked to provide information that could be used to identify you personally. This information will be kept confidential. Only researchers and others that will keep the information confidential (e.g., regulatory agencies or oversight groups) may access information that could personally identify you.

The only identifier linked to your research data is your Prolific ID, which will be used solely for compensation purposes. Your Prolific ID will be stored separately from your data and linked with a temporary random, anonymized ID. No other personally identifiable information will be collected or linked to your research data.

Future Use of Data

Information about you collected for this study may be shared with other researchers, used for other research studies, or placed in a data repository. These studies may be similar to this study or completely different. All information that could identify you will be removed before sharing the data or using it for other research studies. We will not ask you for additional permission before sharing the information.

ACCESS TO YOUR STUDY INFORMATION

We will not give you access to the information that is collected about you in this study.

CONTACT INFORMATION

You are encouraged to ask questions at any time during this study. For information about the study, contact Mark Ho at 212-998-7920, mark.ho@nyu.edu.

If you have questions about your rights as a research participant or if you believe you have been harmed from the research, please contact the NYU Human Research Protection Program at (212)998-4808 or ask.humansubjects@nyu.edu.

AGREEMENT TO PARTICIPATE

By checking below, you are agreeing to participate in this study. Make sure you understand what the study involves before you agree. If you have questions about the study after you agree to participate, you can contact the research team using the information provided above. You may keep a copy of this form.

☐ *I agree to participate in this research study.*
